

Based in the area of Charleroi, our client is an industrial company active in energy and automation technologies.

Technological leader and pioneer in its field, our client develops high-quality energy solutions to accelerate the energy transition towards a sustainable future.

To ensure their strong growth, we are looking for a:

Service Engineer – Energy (M/F)

RESPONSIBILITIES

As a Service Engineer in the after-sales service team, your main responsibilities are:

- Provide installation and after-sales support for our range of products, distributed worldwide.
- After a sound product training, engage in tasks such as commissioning, repairing, and maintenance of highly technical products.
- Carry out a wide variety of tasks, including: on-site interventions, project documentation, remote customer support, post-failure investigations, network measurements, spare parts selection, customer training, and supporting sales and project management teams.
- Deliver quality customer service to satisfy customers.
- Collaborating and networking with colleagues, sharing best practice.
- Embrace the company's values of safety, integrity, and accountability.

PROFILE

- Electrical/Electromechanical Engineer or equivalent experience.
- Min. 3 years of field experience, ideally in an industrial production environment.
- Skills in troubleshooting, electrotechnics and interest or knowledge in the field of power factor correction, harmonic filtration, mechanics and thermal management.
- Willingness to travel and work abroad, or work with local service teams for remote support.
- Customer orientation, strong interpersonal skills, good communication, flexibility, autonomy.
- Fluency in English, French is a plus.

OFFER

- An opportunity to join a company with a worldwide reputation in its sector.
- A full-time position offering a permanent contract and a competitive salary package commensurate with your expertise.
- A pleasant working environment and the opportunity to join a dynamic team on a human scale.
- Frequent working and traveling abroad (short trips of a few days due to interventions) is required, adding a dynamic element to the role.
