

Based in Belgium, a leading aeronautic and aerospace industry player specializes in high-tech product design, development, and mass production worldwide. The company is at the forefront of innovation.

In order to support its growth, the company is actively seeking a (f/m) :

Structure Design Manager - Aeronautics

RESPONSIBILITIES

Ready to drive innovation and lead a dynamic design team? Join as a Structure Design Manager. Your main responsibilities are :

- Collaborating with the Head of Design Department to ensure exceptional service performance and drive strategic initiatives.
- Spearheading the development of cutting-edge design concepts and procedures in collaboration with project managers.
- Implementing efficient processes and innovative tools to streamline project execution and deliver outstanding results.
- Providing mentorship and technical expertise to inspire and empower design teams to achieve their full potential.
- Leading the development of innovative technical solutions that seamlessly integrate economic and industrial constraints, while proactively addressing challenges with the support of design leaders.
- Strategically planning and optimizing both internal and external resources to meet project demands and maximize efficiency.
- Ensuring the highest quality of technical documentation and fostering a culture of continuous improvement within the department.
- Driving employee development, recruitment, and training initiatives to cultivate a high-performing and motivated team.
- Validating design quotes, implementing cost-effective subcontracting strategies, and representing the department to stakeholders to build strong partnerships and drive innovation.

PROFILE

- Master in mechanical, electromechanical, or aerospace engineering.
- Min 8 years of aeronautical structure design experience.
- Experience in people management.
- Leadership, negotiation and communication skills.
- Advanced knowledge in aeronautical structure development, including design, and materials manufacturing processes.
- Fluent in French and English, with strong interpersonal abilities.
- Proactive and versatile with strong analytical and synthesis skills for project needs.
- Proficiency in aerospace CAD & PLM tools (such as CATIA V5, NX, Windchill, & TeamCenter), alongside a strong command of MS Office tools including MS Project.

OFFER

- Offering a dynamic role that blends technical expertise with leadership responsibilities, including team management and strategic decision-making.
- Varied interactions with key industry stakeholders.
- The chance to enhance a prestigious industrial presence globally.
- A company that follows values of openness, respect, innovation and teamwork for both its customers and its employees.
- An appealing salary package with additional benefits, aligned with your experience.
