RESPONSIBILITIES

As a **Project Manager**, you will oversee and lead various projects in the field of high and medium voltage and/or automation for Belgium and Luxembourg.

Your main responsibilities are:

- Coordinate all operational activities to ensure the successful delivery of projects, including **budget management** and **profitability tracking**.
- Plan and monitor project progress to meet established **deadlines**.
- Ensure compliance with **safety standards** throughout project execution.
- Select and negotiate **contracts** with external suppliers and subcontractors, followed by their coordination and follow-up.
- Manage **project documentation** by preparing and sharing all relevant technical specifications with stakeholders.
- Maintain strong technical and commercial **relationships with clients** to achieve customer satisfaction and build long-term partnerships.
- Lead and motivate a multidisciplinary **team of project engineers** and subcontractors.
- Embody the company's core values of safety and integrity by taking responsibility for your actions and fostering a collaborative work environment.

PROFILE

- You hold a bachelor's or master's degree in Electrical or Energy Engineering (or a related technical field).
- You have a minimum of 5 years of experience as a project manager in the electricity sector, ideally in high or medium voltage projects.
- You demonstrate experience in site management and project coordination.
- You are fluent in Dutch, French, and English, both orally and in writing.
- You exhibit excellent organizational skills, an analytical mindset, good communication and a solid sense of commercial insight.

OFFER

- The opportunity to join a company with a worldwide reputation in its sector.
- A full-time job with a permanent contract and a competitive compensation package salary in line with your experience.
- The opportunity to join a dynamic team and to occasionally travel abroad.
- To take part in innovative project within an international company.
