

Our client is an engineering consultancy specialized in the field of numerical simulation.

Active in several sectors, it supports its clients and partners—including major industry leaders from the Liège region—in various R&D projects. Driven by strong values, it is recognized for its expertise and responsiveness.

For one of its key clients located on the Dutch-Belgian border, we are actively looking for a **Maintenance Field Planner E&I**.

Maintenance Field Planner E&I

RESPONSIBILITIES

As a **Maintenance Field Planner E&I**, you will be responsible for the preparation, planning, and follow-up of electrical and instrumentation maintenance activities in the field. Your role ensures that all technical interventions are properly scheduled, coordinated, and executed with a high level of safety and efficiency.

Your key responsibilities will include:

- **Prepare and document** field work instructions for E&I activities.
- **Coordinate** with technicians, contractors, and supervisors on the execution of maintenance tasks.
- **Develop detailed schedules and planning** for maintenance interventions.
- **Ensure proper resource allocation** (tools, materials, personnel) for all planned activities.
- **Monitor compliance** with HSE guidelines and operational procedures.
- **Collect technical input** from the field and incorporate it into updated work plans.
- **Track the progress** of ongoing interventions and adjust the planning if needed.
- **Liaise with stakeholders** across departments to ensure technical alignment and follow-up.

PROFILE

- You hold a **technical degree** or equivalent experience in **electrical engineering**.
- You have at least **5 years of experience** in work preparation or field planning within the **industrial sector**.
- You possess a solid understanding of **industrial electrical systems** and **instrumentation**.
- You demonstrate strong planning and coordination skills in technical environments.
- You are familiar with **safety standards** and operations in a **(petro)chemical context**.
- You communicate clearly with both field technicians and project engineers.

OFFER

- A **diverse role** with significant impact, offering engaging responsibilities and interesting projects.
- The opportunity to **join a network of passionate engineers** working in cutting-edge fields, within an international environment.
- Start date: As soon as possible & End date: 04/05/2026.
- 📍 Location: Based near the Dutch-Belgian border, the role is located within an industrial zone easily accessible from Liège, Maastricht, and surrounding areas.
