

Our client is an engineering consultancy specialized in the field of numerical simulation.

Active across multiple sectors, the company supports its clients and partners — including major industry leaders in the Liège region — on various R&D projects. Driven by strong values, it is recognized for its expertise and responsiveness.

For one of its key clients located in the Liège area, we are actively looking for a **Compliance & Engineering Lead**.

Compliance & Engineering Lead

RESPONSIBILITIES

As a key player in the organization, you ensure the full alignment of the company's systems and products with international norms and safety requirements, supporting project teams from concept to deployment.

- **Ensure** compliance of systems and products with **global standards** (ASME, PED, IECEx, etc.).
- **Lead** the company's **certification strategy** for both EU and US markets.
- **Support** development teams by integrating compliance at every stage of the product lifecycle.
- **Prepare and review** technical documentation required for product certification.
- **Monitor and interpret** regulatory changes and **emerging directives**.
- **Coordinate** external audits and **liaise with notified bodies**.
- **Collaborate** with engineering teams across mechanical, electrical, and control systems.
- **Promote** internal awareness and **train teams** on compliance procedures and best practices.

PROFILE

- **You have** 10–15 years of experience in **regulatory or compliance roles**, ideally within Oil & Gas, chemicals, or energy.
- **You hold** a master's degree in **civil or industrial Engineering**.
- **You are skilled** in dealing with international norms (ASME, PED, ATEX, IECEx, etc.).
- **You bring** a strong **technical foundation** in mechanical, electrical, and automation systems.
- **You are fluent** in **English**; **French** is a plus.
- **You demonstrate** solid **leadership**, with strong communication and **priority management** skills in international settings.
