

Based in the area of Charleroi, our client is an industrial company active in **energy and automation** technologies.

Technological leader and pioneer in its field, our client develops high-quality **energy solutions to accelerate the energy transition** towards a sustainable future.

To ensure their strong growth, we are looking for a **Quality Engineer (M/F)**.

Quality Engineer – Operations (M/F)

RESPONSIBILITIES

As a Quality Engineer, you drive process quality improvement in production and assembly, manage nonconformities, and support audits, all within a Lean Operating Model (LOM) framework. You report to the Factory Quality Manager.

Your main responsibilities are:

- Oversee internal nonconformities and assess the risks associated with requests for deviation, ensuring high-quality product delivery.
- Lead scrap analysis, addressing production quality issues, and ensuring improvement of operational quality.
- Identify improvement opportunities and lead corrective and preventive actions.
- Support internal audits and ensure process compliance with internal policies and applicable regulations.
- Operate within a framework shaped by the Lean Operating Model (LOM), ensuring that processes align with Lean principles such as efficiency, flow, and waste elimination.

PROFILE

- You hold a master's degree in (electromechanical, electricity or any relevant technical field) engineering.
- A first professional experience in quality (engineering) in a manufacturing environment is a plus. Young Graduates are welcome.
- You demonstrate experience in an industrial environment with high level of standard and quality.
- You are detail-oriented, analytical, solution-driven and demonstrate a strong sense of ownership.

- You are fluent in French and English, both written and spoken.

OFFER

- The opportunity to join a company with a worldwide reputation in its sector.
- A full-time job with a permanent contract and a competitive compensation package salary, in line with your experience.
- A pleasant working environment and the opportunity to join a dynamic team on a human scale.
